boston police officer catapults off playground slide in viral video: Social Media in Industrial China Xinyuan Wang, 2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people - their relationship with education, with family, with politics, with 'home' - and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

boston police officer catapults off playground slide in viral video: Breaking the Spell Robé, Chris, 2017-05-01 Breaking the Spell offers the first full-length study that charts the historical trajectory of anarchist-inflected video activism from the late 1960s to the present. Two predominant trends emerge from this social movement-based video activism: 1) anarchist-inflected processes increasingly structure its production, distribution, and exhibition practices; and 2) video does not simply represent collective actions and events, but also serves as a form of activist practice in and of itself from the moment of recording to its later distribution and exhibition. Video plays an increasingly important role among activists in the growing global resistance against neoliberal capitalism. As various radical theorists have pointed out, subjectivity itself becomes a key terrain of struggle as capitalism increasingly structures and mines it through social media sites, cell phone technology, and new "flexible" work and living patterns. As a result, alternative media production becomes a central location where new collective forms of subjectivity can be created to challenge aspects of neoliberalism. Chris Robé's book fills in historical gaps by bringing to light unexplored video activist groups like the Cascadia Forest Defenders, eco-video activists from Eugene, Oregon; Mobile Voices, Latino day laborers harnessing cell phone technology to combat racism and police harassment in Los Angeles; and Outta Your Backpack Media, indigenous youth from the Southwest who use video to celebrate their culture and fight against marginalization. This groundbreaking study also deepens our understanding of more well-researched movements like AIDS video activism, Paper Tiger Television, and Indymedia by situating them within a longer history and wider context of radical video activism.

Snow wrote about the two cultures of science and the humanities; these developments may finally help to change the outlook of those who view science and technology as separate from the general culture. In this rich compendium, Wilson offers the first comprehensive survey of international artists who incorporate concepts and research from mathematics, the physical sciences, biology, kinetics, telecommunications, and experimental digital systems such as artificial intelligence and ubiquitous computing. In addition to visual documentation and statements by the artists, Wilson examines relevant art-theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future. He also provides lists of resources including organizations, publications, conferences, museums, research centers, and Web sites.

The book is separated into sections that address different ways that the presence or absence of a father affects both the man and the family, from the conceptual questions of fatherhood to historical perspectives--including the input of class and race issues--to the portrayal of fathers in the media. By turning attention to aspects of fatherhood, each study illuminates the role of the male

boston police officer catapults off playground slide in viral video: Disgraceland Jake Brennan, 2019-10-01 From the creator of the popular rock 'n' roll true crime podcast, Disgraceland comes an off-kilter, hysterical, at times macabre book inspired by true stories from the highly entertaining underbelly of music history. You may know Jerry Lee Lewis married his thirteen-year-old cousin but did you know he shot his bass player in the chest with a shotgun or that a couple of his wives died under extremely mysterious circumstances? Or that Sam Cooke was shot dead in a seedy motel after barging into the manager's office naked to attack her? Maybe not. Would it change your view of him if you knew that, or would your love for his music triumph? Real rock stars do truly insane things and invite truly insane things to happen to them; murder, drug trafficking, rape, cannibalism and the occult. We allow this behavior. We are complicit because a rock star behaving badly is what's expected. It's baked into the cake. Deep down, way down, past all of our self-righteous notions of justice and right and wrong, when it comes down to it, we want our rock stars to be bad. We know the music industry is full of demons, ones that drove Elvis Presley, Phil Spector, Sid Vicious and that consumed the Norwegian Black Metal scene. We want to believe in the myths because they're so damn entertaining. Disgraceland is a collection of the best of these stories about some of the music world's most beloved stars and their crimes. It will mix all-new, untold stories with expanded stories from the first two seasons of the Disgraceland podcast. Using figures we already recognize, Disgraceland shines a light into the dark corners of their fame revealing the fine line that separates heroes and villains as well as the danger Americans seek out in their news cycles, tabloids, reality shows and soap operas. At the center of this collection of stories is the ever-fascinating music industry--a glittery stage populated by gangsters, drug dealers, pimps, groupies with violence, scandal and pure unadulterated rock 'n' roll entertainment.

boston police officer catapults off playground slide in viral video: Rethinking Gamification Mathias Fuchs, Sonia Fizek, Paolo Ruffino, 2014 Gamification marks a major change to everyday life. It describes the permeation of economic, political, and social contexts by game-elements such as awards, rule structures, and interfaces that are inspired by video games. Sometimes the term is reduced to the implementation of points, badges, and leaderboards as incentives and motivations to be productive. Sometimes it is envisioned as a universal remedy to deeply transform society toward more humane and playful ends. Despite its use by corporations to manage brand communities and personnel, however, gamification is more than just a marketing buzzword. States are beginning to use it as a new tool for governing populations more effectively. It

promises to fix what is wrong with reality by making every single one of us fitter, happier, and healthier. Indeed, it seems like all of society is up for being transformed into one massive game. The contributions in this book offer a candid assessment of the gamification hype. They trace back the historical roots of the phenomenon and explore novel design practices and methods. They critically discuss its social implications and even present artistic tactics for resistance. It is time to rethink gamification!

Michiel de Lange, Valerie Frissen, Joost Raessens, Sybille Lammes, 2015 In this publication, eighteen scholars examine the increasing role of digital media technologies in identity construction through play.
