today in history november 10: On This Day in History Sh!t Went Down James Fell, 2021-04-17 Sh!t happens. Every day. Mae West was sent to jail for "corrupting the morals of youth" with her first Broadway play. When participation in the Hitler Youth became mandatory in Germany, groups of teen "pirates" rebelled. Muhammad Ali refused to "drop bombs and bullets on brown people" in Vietnam. A dog sled relay carried life-saving medicine 674 miles through -50 temperatures to rescue children dying from diphtheria. The Dionne Quintuplets were stolen by the Canadian government and displayed like zoo animals for profit. Indian princess Noor Inayat Khan was one of the most successful spies against the Nazis in World War II. A children's television show called Caillou tortured parents for more than a decade . . . Sh!t goes down every single day of the year, year after year. Sometimes it's a battle that changes the course of history, other times it's a life-saving medical advancement. Bravery is counter-balanced with cowardice. There is slavery and there is self-sacrifice. History is replete with deeds both noble and despicable. Some were motivated by greed, others generosity. Many dedicated themselves to the art of killing, while others focused their efforts on curing. There have been grave mistakes and moments of greatness. Confrontation and cooperation. Early in the twentieth century Spanish philosopher George Santayana wrote, "Those who cannot remember the past are condemned to repeat it." But history serves not just as a warning; it also offers encouragement. Humanity is not endless suck. There is inspiration to be found amidst the atrocities. On This Day in History Sh!t Went Down will significantly expand your knowledge of world history in the most hilarious and profane way possible.

today in history november 10: Walk through Fire Yasmine Ali, 2023-02-21 In the tradition of the bestselling Chesapeake Requiem, WALK THROUGH FIRE is the first book to examine the Waverly Train Disaster of 1978, its impact on the rural community of Waverly, Tennessee, and its impact on the United States, as it catalyzed the formation of FEMA. Coinciding with the 45th anniversary of the event, this book is a tribute to the first responders, as well as an examination of the strengths and vulnerabilities in rural America. On the night of February 22, 1978, a devastating freight train derailment drastically altered Waverly, Tennessee, and its place in history. This was one of the worst train explosions of the twentieth century, killing 16 people, injuring hundreds more, and causing millions of dollars in damage. What could have been dismissed as a single community's terrible misfortune instead became the catalyst for radical change, including the formation of FEMA, much-needed reforms in emergency response training, and the creation and enforcement of national and state safety regulations. Response to the disaster reshaped American infrastructure and laid the groundwork for the future of emergency management and disaster relief . . . and yet most Americans have never heard of Waverly. Dr. Yasmine S. Ali, an award-winning medical writer and Waverly native, sets out to change this in Walk Through Fire, drawing from over a decade of meticulous

research and interviews with survivors, first responders, and other firsthand accounts, including those of her own parents, first-generation Americans who were on call at the local hospital that treated the victims. Ali weaves a compelling narrative of small-town tragedy set against the broader backdrop of U.S. railroad history, rural healthcare, and other elements of American infrastructure that played a part in the creation—and the aftermath—of the Disaster. A tribute to resiliency and a call to action, *Walk Through Fire* tells the harrowing story of the Waverly Train Disaster from the perspectives of those who survived it, and those who still feel its impact today, illuminating how much a nation still has to learn from one small town in Tennessee.

Contributors cover little-known aspects of Mets history that even die-hard fans may not know. Topics include the popularity of Rheingold's advertising in the 1950s and 1960s, Bob Murphy's broadcasting career before joining the Mets' announcing team in 1962, Mr. Met's rivalry with the Phillie Phanatic, Dave Kingman's icon status, the pitching staff's unsung performance after the 1969 World Series victory, and Joan Payson's world-renowned art collection and philanthropy.

today in history november 10: 1927 Thomas S. Hischak, 2019-06-12 The first solo transatlantic flight. The release of the first talking picture. The invention of the jukebox. These are just a handful of milestones that occurred in one momentous year. In a decade of historic firsts, 1927 stands out as the peak year of the Roaring Twenties, a span of time in which dozens of significant events took place—in America and around the world. The economy was booming, the Jazz Age was in full swing, social mores were looser than ever, and the nation was celebrating new dances, gadgets, and heroes. In sports, records were broken, and several champions in different fields thrilled fans with outstanding feats. In *1927: A Day-by-Day Chronicle of the Jazz Age's Greatest Year*, Thomas S. Hischak provides a daily account of this pivotal period in history. Every major news story—on the national and international stage—is accounted for, from popular culture phenomena to minor news items that would prove to be more important later. In addition to Charles Lindbergh's historic flight, the book recounts such events as the discovery of the Peking Man, the execution of Sacco and Vanzetti, the Shanghai Massacre, the Great Mississippi River Flood, and the advent of talking pictures with the arrival of *The Jazz Singer*. From the world of entertainment—the debut of the classic musical *Show Boat* and the formation of the Academy of Motion Picture Arts and Sciences—to headlines that gripped the country, this book focuses on a diverse and complicated year. Scattered throughout the book are interesting statistics and pieces of information regarding life during this era. Highlighting the people, inventions, discoveries, and milestones that made these twelve months so special, 1927 will appeal to armchair historians everywhere.

today in history november 10: Latino History Day by Day Caryn E. Neumann, Tammy S. Allen, 2013-05-09 This title takes a calendrical approach to illuminating the history of Latinos and life in the United States and adds more value than a simple this day in history through primary source excerpts and resources for further research. Latino/a history has been relatively slow in gaining recognition despite the population's rich and varied history. Engaging and informative, *Latino History Day by Day: A Reference Guide to Events* will help address that oversight. Much more than just a this-day-in-history list, the guide describes important events in Latino/a history, augmenting many entries with a brief excerpt from a primary document. All entries include two annotated books and websites as key resources for follow up. The day-to-day reference is organized

by the 365 days of the year with each day drawing from events that span several hundred years of Latino/a history, from Mexican Americans to Puerto Ricans to Cuban Americans. With this guide in hand, teachers will be able to more easily incorporate Latino/a history into their classes. Students will find the book an easy-to-use guide to the Latino/a past and an ideal starting place for research.

today in history november 10: America's First Plague Robert P. Watson, 2023-06-01 As disease spread, the national government was slow to react. Soon, citizens donned protective masks and the authorities ordered quarantines. The streets emptied. Doubters questioned the science and disobeyed. The year: 1793. The place: young America from Baltimore to Boston but especially in Philadelphia, the nation's largest city and seat of the federal government. For 3 long months yellow fever, carried by mosquitoes let loose from a ship from Africa, ravaged the eastern seaboard. The federal government abandoned the city and scattered, leaving a dangerous leadership gap. By the end of the pandemic, ten percent of Philadelphians had died. *America's First Plague* offers the definitive telling of this long-forgotten crisis, capturing the wave of fear that swept across the fledgling republic, and the numerous unintended but far-reaching consequences it would have on the development of the United States and the Atlantic slave trade. It is an intriguing tale of fear and human nature, a tragic lesson of how prejudice toward blacks was so easily stoked, an examination of the primitive state of medicine and vulnerability to disease in the eighteenth century, and a story of the struggle to govern in the face of crisis. With eerie similarities to the Covid pandemic, historian Robert P. Watson tells the story of a young nation teetering on the brink of chaos.

today in history november 10: The Russian Revolution of 1917 - Memory and Legacy Carol S. Leonard, Daniel Orlovsky, Jurej Petrov, 2024-07-30 The way in which the Russian Revolution of October 1917 is regarded and commemorated has changed considerably over time, and is a contentious subject, well demonstrated by the absence of any official commemoration in Russia in 2017, a huge contrast to the very large celebrations which took place in Soviet times. This book, which brings together a range of leading historians of the Russian Revolution—from both Russia and the West, and both younger and older historians—explores the changes in the way in which the October 1917 Revolution is commemorated, and also examines fundamental questions about what the Russian Revolution—indeed what any revolution—was anyway. Among the issues covered are how Soviet and Western historians diverged in their early assessments of what the Revolution achieved, how the period studied by historians has recently extended both much earlier before 1917 and much later afterwards, and how views of the Revolution within the Soviet Union changed over time from acceptance of the official Communist Party interpretation to more independent viewpoints. Overall, the book provides a major reassessment of one of the twentieth century's most important events.

today in history november 10: This Day in Sports History Ray G. Claveran, I have been an avid sports fan since the 1950s. Prior to the '60s, I played in high school and two years of college basketball and was on the college golf team. Today I am a life member of the PGA of America. So I can say that I have had a love affair with sports. I truly believe that true, honest, and fair competition in sports build character. To compete in any sporting event and to win fair and square is something to be proud of. If you did not win fairly, then there is nothing to be proud of. If you did not win fairly, you did not win; you lost. You should never accept first place if you know it belongs to another. RAY G. CLAVERAN

today in history november 10: *Defectors from the PRC to Taiwan, 1960-1989* Andrew D. Morris, 2022-03-31 Defections from the People's Republic of China (PRC) were an important part of the narrative of the Republic of China (ROC) in Taiwan during the Cold War, but their stories have previously barely been told, less still examined, in English. During the 1960s, 70s and 80s, the ROC government paid much special attention to these anti-communist heroes (fangong yishi). Their choices to leave behind the turmoil of the PRC were a propaganda coup for the Nationalist one-party state in Taiwan, proving the superiority of the Free China that they had created there. Morris looks at the stories behind these headlines, what the defectors understood about the ROC before they arrived, and how they dealt with the reality of their post-defection lives in Taiwan. He also looks at how these dramatic individual histories of migration were understood to prove essential differences between the two regimes, while at the same time showing important continuities between the two Chinese states. A valuable resource for students and scholars of 20th century China and Taiwan, and of the Cold War and its impact in Asia.

today in history november 10: *Bizarre Brooklyn: Stories of the Tragic, Macabre and Ghostly* Allison Huntington Chase, 2022-09 Brooklyn. The most populous borough in New York City. Birthplace of the Dodgers, Sweet'n Low, and Season 21 of The Real World. With more than 400 years under its belt, the borough is filled with a history of both sweet and savory moments. It's hard to imagine Brooklyn as anything other than a concrete jungle. Who would guess that that first battle of the Revolutionary War was fought here? Or that the world's oldest subway is hidden beneath the streets of Boerum Hill? Or how an airplane fell from the sky and landed in the middle of the street in Park Slope? Hundreds of people pass by the Prison Ship Martyrs Monument in Fort Greene Park everyday. Virtually no one stops to read the plaque. If they did, they would learn that it is actually a grave, holding up to 15,000 bodies. Author Allison Huntington Chase, Brooklyn's own Madame Morbid, takes readers on a journey beyond the brownstones, to discover the hidden, macabre and bizarre throughout Brooklyn history.

today in history november 10: *This Day in American History* Ernie Gross, 1990 This is a meat-and-potatoes reference work, garnished only with a brief preface, a one-page bibliography, and an index. The text is organized by day of the month, listing in chronological order events that occurred in American history. This logical layout will make the book easy to use for librarians and

patrons alike. Entries are written in a telegraphic, curt style that in some cases may require clarification. The 70-page index is useful but flawed, lacking comprehensiveness and containing some incorrect citations. The Encyclopedia of American Facts & Dates (HarperCollins, 1987. 8th ed.), while less current, is more thorough and better indexed, for less money. Recommended, with reservations, as a secondary source for public and school libraries.-- James Moffet, Baldwin P.L., Birmingham, Mich. - Library Journal.

today in history november 10: A Century of Segregation Leland Ware, 2018-10-18 This book explains how race and class intersect in ways that uniquely disadvantage racial minorities. The narrative begins with the 1896 decision in Plessy v. Ferguson. The Supreme Court ruled that separate facilities for blacks were permissible under the Fourteenth Amendment if they were "equal" to those reserved for whites. One reaction was the establishment of the NAACP to lead the fight for Civil Rights. After more than two decades of lobbying and public education, a long-range, carefully orchestrated, litigation campaign was launched. Segregation would be challenged with lawsuits insisting that black schools be made physically and otherwise equal to white schools. The lawyers calculated that the resulting burden and expense would ultimately cause segregation to collapse under its own weight. A series of successful "equalization" suits spanning over two decades laid the foundation for the direct challenge in Brown v. Board of Education. That 1954 decision inspired a large-scale, grass roots Civil Rights Movement. A decade of marches, boycotts, and mass protests persuaded Congress to enact the Civil Rights laws of the 1960s. Today, conditions for ethnic minorities are far better than they were a generation ago. However, the story of the nation's black and brown communities is a tale of two cities; one prosperous, educated and affluent adjacent to another suffering from grinding poverty and a lack of opportunities for advancement. For those able to take advantage of the opportunities created by the Civil Rights revolution, the gains have been dramatic. For those left behind in impoverished communities, the obstacles to advancement are more daunting today than they were a generation ago.

today in history november 10: Descartes's Secret Notebook Amir D. Aczel, 2009-02-19 René Descartes (1596—1650) is one of the towering and central figures in Western philosophy and mathematics. His apothegm "Cogito, ergo sum" marked the birth of the mind-body problem, while his creation of so-called Cartesian coordinates has made our intellectual conquest of physical space possible. But Descartes had a mysterious and mystical side, as well. Almost certainly a member of the occult brotherhood of the Rosicrucians, he kept a secret notebook, now lost, most of which was written in code. After Descartes's death, Gottfried Leibniz, inventor of calculus and one of the greatest mathematicians of all time, moved to Paris in search of this notebook—and eventually found it in the possession of Claude Clerselier, a friend of Descartes's. Leibniz called on Clerselier and was allowed to copy only a couple of pages—which, though written in code, he amazingly deciphered there on the spot. Leibniz's hastily scribbled notes are all we have today of Descartes's notebook. Why did Descartes keep a secret notebook, and what were its contents? The answers to these questions will lead the reader on an exciting, swashbuckling journey, and offer a fascinating look at one of the great figures of Western culture.

today in history november 10: Vote Her In Rebecca Sive, 2018-10-16 A seasoned political analyst and strategist argues why the U.S. must elect a woman president now and lays out a plan of action to make it happen. Yes. She. Can. *Vote Her In* addresses the unrealized dream of millions of American women: electing our first woman president. It makes the case for the urgency of women attaining equal executive power at all levels, including the presidency, and offers a comprehensive strategy for every woman to be a part of this campaign—the most important of our lifetimes. Women are wildly underrepresented at every level of the U.S. government: federal, state, and local. Research has shown that women in executive government positions are far more likely than men to commit to policies that benefit women, girls, and other marginalized groups. So, after centuries of underrepresentation, it's clear: our best bet for creating a system that is more fair, balanced, and just for everyone is electing our first Madam President—as soon as we can. *Vote Her In* is organized around the inspirational messages seen on protest signs carried at the record-breaking 2017 Chicago Women's March. Part One outlines the case for why we need to mobilize now, and Part Two provides a clear strategy for how to do it. Each chapter in Part Two includes an action plan that women can complete to help each other (or themselves) attain political power and work toward electing our first woman president. Author Rebecca Sive draws on her decades of political experience to create this crucial book, which empowers every American man, woman, and child who cares about our nation's democratic future to harness their collective power in the run-up to 2020 and, at last, form a more perfect union. Praise for Rebecca Sive's *Vote Her In* "Rebecca astutely explores a critical question: If we believe in justice for every American, will we work to elect women to public offices across the country, including the presidency? We must!" —Lisa Madigan, former attorney general, Illinois "Sive takes her years of dedication to advancing women's political careers and causes and turns them into a call to action?along with some of the practical tools needed for real and rapid progress." —Katherine Baicker, dean, University of Chicago Harris School of Public Policy "Far too few women, especially women of color, have the opportunity to become political leaders. Let's #VoteHerIn, as Sive's inspirational guide so powerfully argues." —Kimberly M. Foxx, state's attorney, Cook County, Illinois

today in history november 10: Pauline Frederick Reporting Marilyn S. Greenwald, 2014 *Pauline Frederick Reporting* is the biography of the life and career of the first woman to become a network news correspondent. After no less an authority than Edward R. Murrow told her there was no place for her in broadcasting, Pauline Frederick (1908-90) cracked the good old boys' club through determination and years of hard work, eventually becoming a trusted voice to millions of television viewers. During Frederick's nearly fifty years as a journalist, she interviewed a young Fidel Castro, covered the Nuremberg trials, interpreted diplomatic actions at the United Nations, and was the first woman to moderate a presidential debate. The life of this pivotal figure in American journalism provides an inside perspective on the growth and political maneuverings of television networks as well as Frederick's relationships with iconic NBC broadcast figures David Brinkley, Chet Huntley, and others. Although Frederick repeatedly insisted that she would trade her career, glamorous as it was, to have a family, a series of romances ended in heartache when she did indeed choose her work over love. At the age of sixty-one, however, she married and attained the family life she had always wanted. Her story is one for all modern women striving to balance career and family.

today in history november 10: Listen to Pop! James E. Perone, 2018-09-01 Listen to Pop! discusses the evolution of pop music in America from the 1950s to the present, diving into its impact on American culture, particularly through its association with television, and its enduring legacy. Listen to Pop!: Exploring a Musical Genre provides readers with an overview and a history of the pop music genre. The bulk of the book is devoted to analysis of 50 must-hear musical examples, which include artists, songs, and albums. Additionally, the book contains chapters that analyze the impact of pop music on American popular culture and the legacy of pop music, including how the music is used today in film and television soundtracks and in television commercials. The book deals with all of the various subgenres of pop music from the 1950s to the present. The selection of material discussed reflects the artists, songs, and albums topping the pop music charts of the period, and while the volume examines these items individually, it also discusses how our definition of pop music has evolved over the decades. This combination of detailed examination of specific songs, albums, and artists and discussion of background, legacy, and impact distinguishes it from other books on the subject and make it a vital reference and interesting read for all readers and music aficionados.

today in history november 10: Finding Her in History Rosemary Papa, 2017-06-16 This monograph was cultivated from the AERA SIG, Women in Education 2016 address and delivers a brief review of his-story in terms of the lack of her-story being included through three parallel lines: 1) historical documents on formation of the family and work in and outside the home from the Paleolithic era; 2) the development of traditional religions and the subjugation of women beginning with the conniving seductress Eve; and, 3) the discussion of major wars and the nation/state policies produced throughout history with impacts on girls and women, as well, the precarious health of the planet. This brief review of his-story reveals the continued exclusion of her-story with the example of Willystine Goodsell, a historian, ironically erased from history in education. The premise that subjugation of women and children as lesser than males has been supported both in the name of protecting them and in shaming them. The combined ubiquitous effects of disequilibrium created by mankind in wars, religions, education, social capital, economics and politics, have ensured his-story is the one recorded. This monograph suggests a more balanced approach to the written her-his-story requires inclusion of all the population and the secular educating of especially girls and women.

today in history november 10: The House of Kennedy James Patterson, 2020-04-13 Now with an all-new bonus chapter—in the bestselling *The House of Kennedy*, “James Patterson applies his writerly skills to real-life history . . . re-telling the political clan’s rise and fall and rise again (and fall again) with novelistic style” (People). The Kennedys have always been a family of charismatic adventurers, raised to take risks and excel, living by the dual family mottos: To whom much is given, much is expected and Win at all costs. And they do—but at a price. Across decades and generations, the Kennedys have occupied a unique place in the American imagination: charmed, cursed, at once familiar and unknowable. *The House of Kennedy* is a revealing, fascinating account of America's most storied family, as told by America's most trusted storyteller.

today in history november 10: Generation Z Billy Wilson, 2021-10-19 GENERATION Z is called and equipped to rise above the global storm we are experiencing and initiate the greatest awakening our world has ever seen. They are ready. They are willing. They are born for the storm. Generation Z is officially the largest generation in the world today. They are creative, driven, entrepreneurial, and technologically advanced. Generation Z comes of age in a unique time. This generation is surrounded by turbulence: a global pandemic, racial tensions, political upheaval, economic unrest, and social tensions not experienced by previous generations. They live in a

tumultuous life-sea where the waves are high, the winds are strong, the intensity is unceasing, and the challenges feel insurmountable. This new generation, born between 1997 and 2012, has never witnessed a calm sea. Social harmony, economic stability, physical tranquility, and domestic peace have all been very distant during this period. While those from earlier generations are often disturbed by it all, Generation Z considers these storms a part of their existence. They are survivors, and they are being equipped by God for maximum kingdom impact during a time when the world needs them the most. *Generation Z: Born for the Storm* is written as a book of hope for this new generation. It examines the environment surrounding Gen Z and tries to understand who they are. It also looks at the unique qualities God is forming in Gen Z believers. The book inspirationally describes qualities already emerging and predicts qualities that will emerge as Gen Zers take their place of leadership in the world. Each chapter focuses on a person or persons from the Bible whose names begin with "Z" and who embody qualities God is forming in this new generation. This is not an exhaustive volume on Gen Z. It is simply a snapshot in time connected to the timeless truths of Scripture that will help us reflect upon, respond to, and empower the most important generation to ever live. Their potential is beyond description. Gen Z will take the negative circumstances they have been given and, by God's grace, turn them into positives. Generation Z is ready. God is equipping. The Holy Spirit is moving. The world is waiting. The winds are blowing, and the waves are roaring. Spiritual history is going to be made because Generation Z is born for the storm.

today in history november 10: *Attack from Within* Barbara McQuade, 2024-02-27 A NEW YORK TIMES BESTSELLER An urgent, comprehensive explanation of the ways disinformation is impacting democracy, and practical solutions that can be pursued to strengthen the public, media, and truth-based politics MSNBC's legal expert breaks down the ways disinformation has become a tool to drive voters to extremes, disempower our legal structures, and consolidate power in the hands of the few. One of the most acute observers of our time shares . . . a compelling work about a challenge that—left unexamined and left unchecked—could undermine our democracy. —Eric H. Holder Jr, 82nd Attorney General of the United States American society is more polarized than ever before. We are strategically being pushed apart by disinformation—the deliberate spreading of lies disguised as truth—and it comes at us from all sides: opportunists on the far right, Russian misinformed social media influencers, among others. It's endangering our democracy and causing havoc in our electoral system, schools, hospitals, workplaces, and in our Capitol. Advances in technology including rapid developments in artificial intelligence threaten to make the problems even worse by amplifying false claims and manufacturing credibility. In *Attack from Within*, legal scholar and analyst Barbara McQuade, shows us how to identify the ways disinformation is seeping into all facets of our society and how we can fight against it. The book includes: The authoritarian playbook: a brief history of disinformation from Mussolini and Hitler to Bolsonaro and Trump, chronicles the ways in which authoritarians have used disinformation to seize and retain power. Disinformation tactics—like demonizing the other, seducing with nostalgia, silencing critics, muzzling the media, condemning the courts; stoking violence—and reasons why they work. An explanation of why America is particularly vulnerable to disinformation and how it exploits our First Amendment Freedoms, sparks threats and violence, and destabilizes social structures. Real, accessible solutions for countering disinformation and maintaining the rule of law such as making domestic terrorism a federal crime, increasing media literacy in schools, criminalizing doxxing, and much more. Disinformation is designed to evoke a strong emotional response to push us toward more extreme views, unable to find common ground with others. The false claims that led to the breathtaking attack on our Capitol in 2021 may have been only a dress rehearsal. *Attack from Within* shows us how to prevent it from happening again, thus preserving our country's hard-won democracy.
